**DETAILED ACTION**

***Election/Restrictions***

This application contains claims directed to the following patentably distinct species:

Species 1 shown in figures 1-2

Species 2 shown in figure 3

Species 3 shown in figures 4-6

Species 4 shown in figures 7A-8

Species 5 shown in figures 9A-B

Species 6 shown in figures 10A-B

Species 7 shown in figures 11-15

Species 8 shown in figures 16-17

Species 9 shown in figures 18-19

Species 10 shown in figures 20-21

Species 11 shown in figures 22-24

Species 12 shown in figures 25-28

Species 13 shown in figures 29A-B

Species 14 shown in figures 30A-B

Species 15 shown in figures 31A-B

Species 16 shown in figure 32

Species 17 shown in figures 33-36

Species 18 shown in figures 37-38

Species 19 shown in figures 39-40

Species 20 shown in figures 41A-B

Species 21 shown in figure 42

Species 22 shown in figures 43A-B

Species 23 shown in figure 44

Species 24 shown in figures 45A-B

Species 25 shown in figures 46A-B

Species 26 shown in figures 47-48

Species 27 shown in figures 49

Species 28 shown in figures 50

Species 29 shown in figures 51A

Species 30 shown in figures 51B

Species 31 shown in figures 52

The species are independent or distinct because claims to the different species recite the mutually exclusive characteristics of such species. In addition, these species are not obvious variants of each other based on the current record.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are considered generic.

There is an examination and search burden for these patentably distinct species due to their mutually exclusive characteristics. The species require a different field of search (e.g., searching different classes/subclasses or electronic resources, or

employing different search queries); and/or the prior art applicable to one species would not likely be applicable to another species; and/or the species are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

**Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species to be examined** even though the requirement may be traversed (37 CFR 1.143) **and (ii) identification of the claims encompassing the elected species**, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

The election of the species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the election of species requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected species.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the species unpatentable over the

prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other species.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141.

A telephone call was made to John Posa on 8/20/08 to request an oral election to the above restriction requirement, but did not result in an election being made.
